

Paso 1 Registro de Usuario

Método. POST /api/auth/registro

The screenshot shows the VS Code interface with a REST client request and response. The request is a POST to `http://localhost:3000/api/auth/registro` with a JSON body containing user registration details. The response is a 201 Created status with a JSON body indicating success and the created user data.

```
POST http://localhost:3000/api/auth/registro
```

Send

Status: 201 Created Size: 95 Bytes Time: 261 ms

Response

```
{
  "status": "success",
  "data": {
    "usuario": {
      "id": 1,
      "nombre": "Pascual",
      "email": "pilares@gmail.com"
    }
  }
}
```

Terminal

```
PS C:\Users\capri\OneDrive\Documentos\Proyecto_Final_Nodejs> node .\app.js
Servidor corriendo en http://localhost:3000
Librería El Túnel - Modo: desarrollo
Conectado a PostgreSQL - El Túnel
```

Paso 2-Login

Método. Post /api/auth/login

The screenshot shows the VS Code interface with a REST client request and response for user login. The request is a POST to `http://localhost:3000/api/auth/login` with a JSON body containing email and password. The response is a 200 OK status with a JSON body indicating success and the user data.

```
POST http://localhost:3000/api/auth/login
```

Send

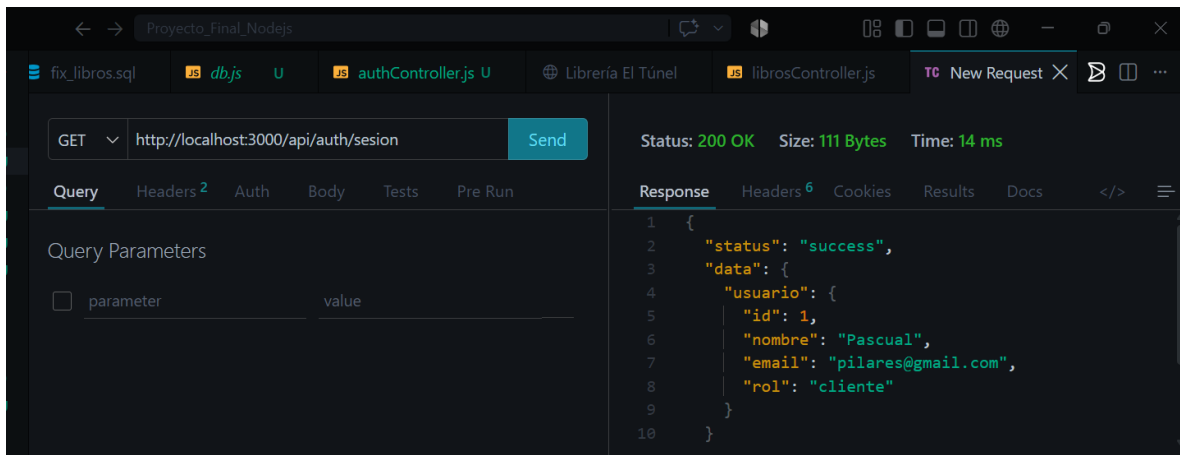

Status: 200 OK Size: 111 Bytes Time: 533 ms

Response

```
{
  "status": "success",
  "data": {
    "usuario": {
      "id": 1,
      "nombre": "Pascual",
      "email": "pilares@gmail.com",
